

acm International Collegiate
Programming Contest
Practice

Where: HRBB, Room 229

When: Thursday, 8 September 2005
at 7:00 P.M.

Contact: icpc@cs.tamu.edu

cup<T>

What does it include?

- C/C++/Java programming
- Programming problems
- Mini-Lectures on special topics

Is programming your cup<T>?

"I'm a container, and I love it. Every night, I call `push_back()` on an instance of myself with different types. I started off with the primitives, you know, `int`, `char`, `bool`, but then I started experimenting a little. Just between you and me, *sometimes I like to, well, nest myself*. I've even gone as deep as `cup<cup<cup<foo>>>`, but *ssshhh*-don't tell anyone."

Like containers? There are many kinds of people in the world, but we all know that it can all be reduced to the following: `person->canCode()` ? true : false. If you evaluate to a non-zero integer, then you should **come to our ACM ICPC Programming contest practice**. Don't think that you're good enough? You may be surprised; with enough practice, you too can go to the ACM ICPC Regionals and **Beat the hell outta t.u.** We did it last year and we can do it this year, but we need your help.

Win great prizes and be the envy of
`you->potentialPartner()`! Don't call `delay()`!

*PRIZES MAY NOT BE AVAILABLE AT FIRST MEETING.
